

SimCentric
3rd floor, Alnitak Building,
752/5, Dr Danister De Silva Mawatha,
00900

Hello,

After looking at your website, which I discovered at www.simct.com, I got the impression that SimCentric is an amazing company that especially focusing on modern AI and gaming technologies. My passion for XR & game development started a long time ago. I have worked in many numbers of XR, Gamng projects and delivered many innovative mobile solutions which are live and available on App store and play store.

Working as a software engineer at my current company made me learn most of software engineering practical concepts, client interaction methods and scrum methodologies. I have also experience in learning and applying new technologies as appropriate. Company RnD Unit was initiated by myself and currently I am working in RnD Unit.

I believe SimCentric will be a great place to enhance my skills and learn new skills so I will be an asset to your organization. With my determination, passion for Game development and ability to adapt to upcoming technologies, I would be a good candidate as an Software engineer at SimCentric.

I have attached a copy of my resume that details my projects and experience in software development. I can be reached anytime via my cell phone, +94714425595 or via email at bsc2fast@gmail.com

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Sincerely,

(Sankha Cooray)
