School of Computing,
The National University of Singapore.

To Whom It May Concern,

I am writing about **Bulathsinalage Sankha Cooray** and his job application. I have known him for nine years as a friend through the University and the Tech industry.

Sankha is a unique individual with a rare skill set. He is a perfectionist with an eye for innovation. Over the years, I was fortunate to explore his innovative projects, from game development to AR/VR applications. Based on his passion, he contributes to the community with new projects to improve the technical knowledge among school students. He is one of the best innovative minds I have come across and can set up proper engineering standards.

Moving back to his personality, He is someone his high integrity and trust. He values sharing his knowledge with others. Therefore he is always well respected among others.

I would recommend Sankha for the Research Engineer position because his technical skill set is unique. With this position, he will be free to work on innovative research projects that will bring value to the University. I believe this will lead to a few significant innovations.

If you require any other additional information, please feel free to contact me via my phone at +6591990750 or email at skularathna@zuelligpharma.com.

Sincerely,

Saminda Kularathna
Engineering Manager, Data Applications
